

Tell me about yourself

if I had to tell about myself in detail, I would break down my experiences based on timeline into three parts, life till 10th, jee period, college life.

But in favour of time, keeping the first two part short, for the first part, I want you imagine a skinny guy, who loves math and plays football a lot. that was me in 8th, 9th, 10th. For the second phase, it simple, just remove the football part, keep the math part and add physics, basically my affinity towards analytical thought process increased manyfolds

Now we are at college, having cleared 'the exam'

I found myself curious for too many things to contemplate.

But I successfully explored numerous dimensions in my college journey in a positive manner.

As a person who has always been academic, I would like to go over my internships and projects.

My summer internship was at Medantrik, it is a med-tech start-up, where they were building a product, and I had to write algorithm for the product.

So we built portable lung health diagnosis device, you can surely have your lung health tested at hospital for 2k/test, which is called spirometry test. Our device does all jobs a spirometry test does and more with just an initial acquisition cost of 6k. Me and my colleague had to built algorithm, right from scratch from research, till collaboration with electronics team for integration. Why from scratch? We can have further discussion, I have loads to tell, it was a great internship.

Moving on I did few more internship, another one at a management start-up, foruppo and Internship at a NGO Muskurahat Foundation where in had to pitch the narrative of muskurahat foundation and raise funds

Moving on to project.

I did many ML projects and loads of coding

The most time expensive project, with wonderful result was.

Yoga Pose detection and feedback generation.

Where it helps you in your self-guided yoga journey.

Where in our idea was, in this times where everyone wants to do yoga, we don't have time to join yoga class, they prefer self-learning because the resources might not be available all the time, but it comes with the risk of incorrect posture, potentially causing health issues.

So we decided to go with this project under Dr. Tushar Sandhan Sir.

It had 2parts

You have a video, a yoga asana, but you don't know the name of the asana.

You upload the video, and our algo will predict the name of the yoga asana for you

and secondly, you are performing a yoga pose, but you don't have any feedback, our model gives you quantitative feedback of your performance of yoga asana.

I did plenty other projects like time series analysis

Moving on, to my extra curricular. As I entered college, I wanted a niche, wanted to represent my college at national level. Initially I tried my hands on football, but the gap years had a toll on my skills. Then I found dance, I was fairly new to the world of dance, but as time went by I found myself leading a 3-tier dance club and our iit kanpurs dance team KOS, winning trophies with team size of 40+ at national level competitions and conducting numerous events for campus junta. Other than that I also tried my hands on Techkriti and Prayas.

So two things are constant from school life, my innate affinity towards analytical mindset and physical fitness.

2 strengths

A high agency individual, who take proactive control over circumstances and outcome, rather than passively reacting to external factors i.e. trying to take full responsibility and ownership of any of my result, good or bad.

The reason I say so, is I challenge myself to solve the given hard situation, rather cribbing over any issue.

languages was never my strongest front, so I proactively choose English Literature course, where in you have to read novels. And I have minor in English literature, I have started writing, and my affinity towards reading and writing is improved many folds

during Antaragni 2022, which happened in march, no secretary was ready to participate in antaragni, I was the one who was the first one to agree, giving path to other, motivated other, while also challenging myself to get a good spi. That was the first sem I got 9spi.

I have always find myself more empathetic than other, I have a habit of trying to analyzing someone situation by imagining to step on someone's shoes, and I feel a immense sense of joy in the act of giving the one in need.

Because of which I find myself to lead through influence

That's why you can see I taught student at Prayas, also wanted in an NGO, so muskurahat foundation

I give value to my words, so I am actually very careful before giving anyone any commitment, if I have done so, then he/she are assured that they can live with me words as truth.

Same Antaragni example, given my word

2 weakness

Sometimes I find it difficult to say no to a situation, and go with the mindset of I can have it, or do it all.

To tackle this, actually my intuition usually always tells what would actually be tough or productive, but the I convince myself for the latter. So, I just take a step back, think clearly for a second, giving space to my intuition and then following it.

eg. Galaxy wla

Sometimes I take less help from other than needed, hindering the result

This is something I have been trying to do. Improve my focus, I do meditate, couldn't find consistency here at college, hopefully after college.

Why PM?

PM is a role, where in acc to me, you either trying to build a product, or improve some feature. All of which require the element of creative thinking and empathetic thinking and out of box element, both of which is a dimension where I believe I have naturally dug deeper into.

My background in activities like sketching and dance has nurtured my creative mindset, my keen interest in solving issues other face has given appreciation for diverse perspectives, and the analytical background which provides me tool to execute the situation in a strategic manner. which I believe makes me a good fit for PM role.

. How do you handle conflicts in a team?

Key Points:

I am someone who avoids conflict and try to resolve it through logically to n frough discussion. Discuss the importance of active listening and understanding different perspectives. Explain a specific situation where you resolved a conflict (focus on communication and compromise).

Ashish, Bitthal, understood ther pov, made them understand the situation, later encouraged them to talk to each other like adults , as we have our whole tenure ahead, and we can't let internal fight effect that.

8. Describe your leadership style.

"Lead Through Example and Influence" refers to a leadership approach where you guide and inspire others without relying on formal authority or positional power. It easier to lead if your sorted internally

☐ How would you describe yourself?

Empathetic, Health Enthusiast, Dancer and good a reasoning

☐ What has been the greatest disappointment in your life?

Not securing summer internship through spo

☐ What are you passionate about?

Dance and Building something

☐ Tell me something which really annoys you?

Fake Conversations

☐ What do people most often criticize about you?

☐ When was the last time you were angry? What happened?

I was not angry angry, but there was junior, because of which we got delay and faces many issues

☐ What are your short-term and long-term objectives? (Both personal and professional).

Personally – Inter IIT and Gym

Professionally – A planning a passion project, where in I will interview Y21s

Long Term – Do great at my job, and see where this lead me through, I would like build something, but having worked at start-up I have seen the responsibility as founder, so no thought there at present

Personally - Good Body and Mind

☐ Why are you the best person for the job?

☐ Why do you want to work here?

I've always been fascinated by how technology products impact everyday lives. As someone who has always seen some or other whatsapp group, selling apparels long before meesho, I am truly fascinate how meesho has tapped into this operational chain. I am really excited to work with this fast paced brilliant team. Meesho's drive of 'problem discovery' & delivery, resonates with me and make it the perfect spot to start my PM career

☐ What can you contribute to this company?

My consious time, creativity, problem solving skills and knack for result

☐ What major challenges and problems have you faced? How did you handle them?

Internship, focused on acads, eventually got internship I am grateful fo.

There are few other personal problems, where in I always found, music, gymming and dance as my companion

☐ Describe a challenging/demanding/arduous work situation/project and how you overcame it.
Summers of 2023, Coordinator sem, 3 performing events, 2 managerials events, dropped a course, managed 9.0 spi

☐ What have you learned from your mistakes?

Mistake of bei

☐ What was it like working for your supervisor?

☐ What do you expect from a supervisor?

☐ How do you handle stress and pressure?

☐ Do you prefer to work independently or on a team?

☐ Describe a situation when you led a team to complete a work-related assignment (acted as a situational leader)? What if you are asked to be a follower halfway during the assignment?

☐ Give some examples of your teamwork in completing a critical project.

☐ What do you feel should happen to people who fail to perform?

☐ When was the last time you missed a significant deadline? Why? What did you do after that?
