To Whom It May Concern

I am pleased to confirm that Kaustav Dasgupta completed his AI Algorithm internship at Medantrik from May 2024 to August 2024. During his tenure, Kaustav significantly contributed to our projects, particularly in developing advanced AI algorithms for the NODex device, a personalized device for monitoring and managing respiratory diseases. His work played a crucial role in enhancing the accuracy and effectiveness of the NODex device, allowing it to provide more tailored insights and recommendations for users.

Kaustav demonstrated exceptional initiative in engaging with various stakeholders, including medical professionals, to tailor the algorithms to specific needs. He consistently understood complex requirements and made improvements accordingly, showcasing his technical expertise and commitment to excellence.

Overall Grading System for Kaustav's Internship at Medantrik:

Work: Very Good

Communication: Very Good

Behavior: Very Good

Time Management: Very Good

We are grateful for his contributions and wish him the best in his future endeavors.

Sincerely,

Priyaranjan Tiwari

CEO

Medantrik Medtech Pvt Ltd
